PART 1

LAB SESSION

✓ **String Manipulation**

Lab 5a: Substrings

1. Create the file *5a-substrings.js*.

2. Given the string "The quick brown fox jumps over the lazy dog", write the Javascript to find all possible ways to:

    a)   Use substr() to extract the substring "dog".

    b)   Use substring() to extract the substring "dog".

    c)   Use slice() to extract the substring "dog".
